

Protected Cultivation

Greenhouse & Shade net House

Why Protected Cultivation...

Protected Cultivation - Greenhouse & Shadenet House

Greenhouse is framed structures covered with UV stabilized plastic films in which crops are grown under partially or controlled environment conditions.

Type of Structures

A. Naturally Ventilated – Tubular, Wooden & Bamboo

B. Fad & Pad System

Shadenet house are considered as one of the major technologies to provide development of healthy grafts/ seedlings & hardening for various horticultural crops irrespective of climatic conditions.

Advantages

- Moderates humidity & temperature
- Plant propagation is effective.
- Helps to improve quality and quantity of produce.
- Reduces infestation of disease / pests.
- Savings in water & fertilizer requirements as compared to open field cultivation.
- Reduces gestation period of the crop.
