- For growing exotic vegetable and exotic flowers in adverse condition

Specification:

- Size: 500 smt, 1000smt, 2000smt,4000 smt
- Covering materials:- 6/8/10mm uv coated polycarbonate sheet
- Ventilation: auto
- Shade net included
- Cooling : cooling fan and cooling pad

Hi-tech Poly House

Application:

- For growing exotic vegetable and exotic flowers in adverse condition

Specification:

- Hot dipped galvanized tubular structure in 2mm thick*
- Size: 500 smt, 1000smt, 2000smt, 4000 smt
- Covering materials:- 200 micron polyfilm
- Ventilation: auto/manual
- Roof up: auto roof up
- Insect net included
- Shade net included
- Cooling: cooling fan and cooling pad
- Cooling: ventilation fan

Natural Ventilation

Application:

- For growing vegetable and flowers

Specification:

- Hot dipped galvanized tubular structure in 2mm thick*
- Size: 500 smt, 1000smt, 2000smt, 4000 smt
- Covering materials:- 200 micron polyfilm
- Ventilation: manual
- Roof up: auto/manual
- Insect net included
- Shade net included

Hydroponic Green House

Application:

- For growing exotic vegetable in adverse condition

Specification:

- Size: 500 smt, 1000smt, 2000smt,4000 smt
- Covering materials:- 6/8/10mm UV coated polycarbonate sheet
- Shade net include
- Cooling : cooling fan and cooling pad

Shade Net Poly House

Application:

- For growing vegetable and flowers

Specification:

- Hot dipped galvanized tubular structure in 2mm thick*
- Size: 25%, 50%, 75%, 90%
- Covering materials:- 80 gsm/smt
- Ventilation: manual

Insect Net Poly House

Application:

- For growing vegetable and flowers
- Protected from insect

Specification:

- Hot dipped galvanized tubular structure in 2mm thick*
- Covering materials:- insect net
- Ventilation: manual

Tunnel / Dome Poly House

Application:

- For Nursery Purposes

Specification:

- Hot dipped galvanized tubular structure in 2mm thick*
- Covering materials:- 200 micron polyfilm
- Ventilation: manual
- Roof up: auto/manual
- Shade net included
